

Turn a Still Ad Into Motion

A simple ad-to-video workflow with
creative amplification through AI.

1

Draft Prompt

2

Open
Higgsfield.ai

3

Marketing Studio

4

Add Still Ad

5

Generate

★ Higgsfield offers multiple ways to make videos; Marketing Studio is simply a streamlined path for turning a still ad into a short motion asset.

Step 1

Draft the motion prompt in ChatGPT

Describe the movement you want before you generate.

1

Be specific
about what moves.

Name the key elements, camera behavior, and effects you want.

2

Refine until
the direction feels right.

Adjust details and test variations for the best result.

3

Copy the final
prompt into Higgsfield.ai.

Your clear prompt drives better motion right from the start.

“*Creative amplification starts with clear direction.*”

Step 2

Open Higgsfield.ai, then go to Marketing Studio

This is the streamlined path I use when I want to turn a still ad into a short video.

Open the platform

Go to
higgsfield.ai

Sign in if needed

Log in to your account
to access Marketing
Studio.

Click the Marketing Studio tab

Select "Marketing Studio" from the
top navigation.

Note: Higgsfield has multiple video creation paths;
Marketing Studio simply makes this transformation easier.

1. Open Higgsfield.ai

2. Sign in to your account

3. Go to Marketing Studio

The right tool shortens the distance between idea and output.

STEP 3

Choose Video + 5s

Set the format for a short, high-impact clip.

1

Switch to Video

Click Video to create motion instead of a still.

2

Select 5 Seconds

Choose 5s to keep your clip short, snappy, and attention-grabbing.

3

Keep It Short

Short-form video delivers a stronger hook and better results.

3:4 Aspect Ratio

Ideal for vertical platforms and mobile viewing.

Hypermotion

Add cinematic movement and dynamism with AI-powered motion.

Short videos are useful for ads, previews, and quick concept testing.

Fast hook

Grab attention in the first few seconds.

Easy testing

Quick to produce, easy to iterate and refine.

Ad-ready

Built for social feeds and paid campaigns.

Using Higgsfield.ai

Step-by-
Step
Guide

Step 4

Add the still ad

A polished still gives the motion a stronger foundation.

1

Choose a strong
source image

2

Upload it as
the visual base

3

Use it as the
motion source

Ready to
animate

Stronger source

A high-quality still sets
the right tone.

Smoother motion

Clear visuals help AI
animate with precision.

Clearer message

Your brand shines with
sharper impact.

Step 5

Paste your prompt, then **Generate**

Write your motion direction in ChatGPT, copy it, paste it into Higgsfield.ai Marketing Studio, and generate.

ChatGPT

Example Motion Direction (copy this)

Cinematic product video. Start with a close-up on the ArtSwatch.art logo and icons on a clean surface. Camera slowly pushes in and pans right, revealing print samples and a tablet showing the dashboard. Warm light flares and subtle particles add energy. End on the tagline "Power your digital art sales."

1

Paste your motion direction

Copy the final motion direction from ChatGPT and paste it into the Marketing Studio prompt box.

2

Keep the instructions focused

Describe the key shots, camera moves, mood, and ending. Be clear, concise, and visual.

3

Click Generate

Let Higgsfield.ai turn your prompt and product into a motion-rich short video.

STILL (YOUR PRODUCT IMAGE)

MOTION-RICH VIDEO (GENERATED)

Simple direction plus a strong visual can become a powerful short video.

From still design to **moving** asset
